

multiplayer location based hall-scale VR-Experience

The german company your-vr-arena provides with its VR development a solution for a shared VR experience where up to 4 Player can combat on shared space (up to 300m²/ 3200 sq ft). Based on a standalone VR-Headset large areas could be turned into a shared-space, free-roaming VR-Arena.

Your-vr-arena delivers three VR game levels for different location sizes. From 8m to 8m (26ft x 26ft) to 14m x 8m (46 ft x 26 ft) up to 20m x 14m (65 ft x 26ft) up to 4 player can compete on the shared space. No heavy backpack PCs or external sensors are necessary. Only a gateway PC which is equipped with a control software is required in addition to the headsets. The company is currently developing more games so that the user can choose between different vr experiences.

Who is the target group?

The offer is aimed at event companies and startups. E-sports will play a leading role in the future market of leisure activities. Providers of laser tag can expand their offer with the help of this VR-solution.

What are the costs?

The company offers a simple financing model. The Vr experience can be easily rented (monthly or yearly). For startups, the fair use tariff is suitable, where you are only charged for the time you use the VR app/Headset (0.1 eur/min/headset). Monthly costs for rental are 390 eur/month (monthly payment) or 240 eur/month (annual payment). The headsets are not included in the rent.

What are the advantages of this solution?

- Very cost effective.

A VR-arcade can be realized with only a very small initial investment. The fair use tariff is particularly noteworthy, as the founder only pays when the VR app is used.

- Low infrastructure required.

Apart from a router, the VR headsets and a control computer (laptop), nothing else is needed. This also allows applications that are limited in time (renting the hall only temporarily).

- Game development.

The games are intelligently and excitingly developed. Team play, man against man, unforeseen opponents and a mission make the game play exciting and varied, which goes beyond the simple "zombie shooter" level.

Who we are?

your vr arena is a foundation of the entrepreneur and developer Chris Krohne. For years, the entrepreneur has been active in various technical fields. "VR is definitely one of the most interesting future technologies, which will influence the fields of entertainment, e-sports and e-learning to a not inconsiderable extent".
